

*KBS LTER Unmanaged Sites*  
**Nitrogen Deposition Study**

Unmanaged Sites:  
SF = Successional Field  
CF = Coniferous Forest  
DF = Deciduous Forest

The red square depicts the 1-ha primary sampling site within the forest. The green squares represent the 1N and 3N nitrogen deposition microplots. 1N plots (1 g N/m<sup>2</sup>/yr) are 10x10m, 3N plots (3 g N/m<sup>2</sup>/yr) are 2x2m. A similar deployment exists in all SF, CF, and DF sites. The N deposition microplots are not to scale.
